

PolarWhite™ LCDs

With their breakthrough polarizer technology, EDT's new PolarWhite™ LCDs let you stand out from the crowd with superior contrast for easy viewing and operation, improving overall end-product aesthetics.

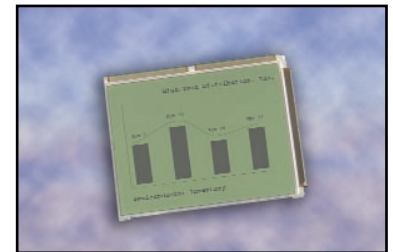

EDT's newest LCDs are the clear choice in displays where a bright, white background is needed.

- High contrast, whiter screen
- High aperture ratio to increase contrast
- Standard graphic modules available
- Economical pricing, fast delivery
- Certified to ISO9002 and QS9000

Polar White™ LCDs are available as a standard on the following stock modules:
